

CEO's Message

"Our Vision is to work together to build a Green Island"

Eddy Tsang

Chief Executive Officer

At GIC, we are all immensely proud of our long history and unique heritage as Hong Kong's largest manufacturing company, in business for 130 years. Ours is a story which Hong Kong can also be proud of, as our growth has gone hand-in-hand with the city's.

It is interesting that people are often amazed when I explain what we do here. They are not aware that such a business still exists in Hong Kong, especially one creating products from raw materials. Since way back in 1887, iconic buildings and infrastructure projects across the city, through to the airport and IFC in recent years, have been constructed using our cement.

Even though cement can be seen as a 'messy' business, we do everything possible to make our plants in both Hong Kong and Mainland China as friendly, welcoming and as orderly as possible. Our experienced engineering team working on health and safety looks in detail at our emissions, while we ensure that we comply fully with all requirements regarding worker well-being. It can be a big challenge running a manufacturing plant in a highly-competitive city and financial centre, but we continue to work very hard, towards one direction.

Thanks to our exceptional team of staff, across the Company, we survived some admittedly difficult years, overcoming hurdles and challenges together. One particularly gratifying thing that I have heard consistently from employees over the years and even from people who subsequently left the Company is that they are all proud of working here and find it a good company to work for, by every definition.

Looking forward, we will continue to innovate and diversify our products to encompass more environmentally-friendly practices, for example by making use of waste as alternative fuels. Fundamentally, we work for the good of the entire community, with a diverse, talented workforce from many different backgrounds, I am confident that together we will continue to help our city to grow for the next 130 years and beyond.

Eddy Tsang.
